# VEGETOLOGY

## BRAND STORY

Can we really live without the gifts of plants?  
They give us everything we need to survive and thrive,  
from nourishing food to healing medicine and even  
the cosmetics we use to pamper ourselves.

For over 30 years, VEGETOLOGY has been studying  
the natural resources that surround us, learning to appreciate  
the limitless potential of the plants that grow in our lands.

With over 4,000 different species of plants that call Korea home,  
there are countless hidden treasures waiting to be uncovered.

That's why VEGETOLOGY was born – to seek out these gifts  
and share them with the world, bringing joy and wellness to all.

And with our patented technology,  
we can do so in a way that keeps our planet healthy  
and vibrant, ensuring a sustainable future.

Join us on our journey towards a green beauty revolution,  
powered by the wonders of nature itself.

## KEY INGREDIENT

( To unlock the first treasure discovered in grape flowers, try Viniferine )

**62 times** stronger than vitamin C

**28 times** more antioxidant than tocopherol

Inhibits melanin production by **28.6%**

Deep skin penetration

### Have you heard of Viniferine?

It's a precious gift found  
in the stems of grapes  
and the tender anthers of  
their flowers. Although it  
may be scarce, its value  
is immeasurable.

And now, thanks to the pioneering work of  
Vegetology, we can harness the power of  
Viniferine like never before. Through the  
magic of grape anther cell culture,  
Vegetology has unlocked the secret to  
producing this miracle substance in  
abundance – a feat that has never been  
achieved before.

With the Viniferine line, you can experience  
the full benefits of this extraordinary  
ingredient, unveiling brighter, more radiant  
skin with every use. Join us on this journey  
of discovery, as we uncover the hidden  
treasures of nature and share them with  
the world.
